

# “FREE BEE” Vending Actuation

KIT0000376 (Non-Mount)

PN# - TBD (Wall Mount)

## What it Does

- ✦ A remote device that activates the machine providing a “free” vend. Activates machine via a local pushbutton after receiving a remote RF activation request.

### HSI

- ✦ Allows customers time to get to the machine before beginning vend
- ✦ Frequency-hopping Spread Spectrum RF Technology, i.e. line-of-sight not required, with confirmation
- ✦ Store walls, glass, obstacles such as delivery trucks are not a problem
- ✦ Free Vend Event created for commission reconciliation purposes
- ✦ Battery operated handheld, or AC powered wall-mount (new)
- ✦ Works with or without a machine actuator button

### Others

- ✦ Fixed frequency RF, i.e. typically requires line-of-sight, without confirmation
- ✦ Store walls, glass, obstacles such as delivery trucks are a problem; result is unreliable operation
- ✦ Analog meter required for Free Vend count tracking
- ✦ AC power line alternative is prone to AC noise and property grid fragmentation problems; results are unreliable

Features real-time reporting of machine status information resulting in faster response times for initiating equipment repairs. Less machine downtime, better cash management, greater customer satisfaction.
